Wetroom Enclosure with Return Screen

 Style may vary

Installation Guide

IMPORTANT

- The toughened glass (EN12150) in our shower enclosures and bath screens is completely safe providing that it is installed with care and according to our guidelines
- Care must be taken when handling and installing the glass to ensure that it doesn't experience any sharp impacts or severe fluctuations in temperature that could cause a stress point to develop within it. For health and safety we advise that two people perform the installation of the product.
- Toughened glass is intrinsically physically and thermally stronger than standard glass to ensure that it is safe for use in the bathroom. In the unlikely event that the glass does break because of the above reasons then it will do so into small, thumbnail sized blunt fragments

PRE-INSTALLATION CHECKS

- Ensure that you have received the correct product by referring to the labels on the product packaging.
- Check the contents of the pack carefully before installation.
- Take special care when unpacking the contents from the packaging, especially the toughened glass components.
- Carefully check all the components you have received for damage or defects before you start installation – we cannot accept responsibility for any defects or damage that you may find once installation has started
- Please take time to read and understand all the instructions supplied with the product prior to starting installation.
- Ensure that there are no hidden pipes or cables before you carry out any drilling.
- Do not attempt to make any alterations to the toughened safety glass itself as this could damage it.
